### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Timothy McCarthy on January 30, 2006.

The application has been amended as follows:

In the claims

Claim 15: line 6, --a distance from the bottom end of the second tube, the tube ring snugly fitting inside the second tube-- has been inserted after the second occurrence of "tube",  
line 7, "and" first occurrence has been deleted; --and said netting tube-- has been inserted before "form".

Claim 16: line 7, --slightly-- has been inserted after "diameter".

Claim 17: line 10, --tube-- has been inserted before "form".

2. The following is an examiner's statement of reasons for allowance: for claim 15, the prior art does not teach a method of rucking netting onto a netting tube wherein a second tube is placed over the netting tube and a tube ring is placed inside and concentric to the second tube a distance from the bottom end of the second tube, the tube ring snugly fitting inside the second tube, whereby the tube ring, the second tube

and the netting tube form an annular space, these in combination with the rest of the limitations in the claim. For claim 16, the prior art does not teach an apparatus for rucking netting onto a tube, the apparatus comprising a second tube having a bore with a first diameter slightly greater than the netting tube outside diameter and demountably alignable co-axially to the netting tube, a notch in an end of the second tube forming an annular space with the netting tube, these in combination with the rest of the limitations in the claim. For claim 17, the prior art does not teach an apparatus for rucking netting onto a tube, the apparatus comprising a netting tube having an outside diameter and an axis, a second tube having a bore with a diameter greater than the netting tube outside diameter and demountably alignable co-axially to the netting tube, a tube ring aligned concentric to the bore of the second tube and sliding axially over the netting tube, whereby the tube ring, the second tube and the netting tube form an annular space, these in combination with the rest of the limitations in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Essama Omgba whose telephone number is (571) 272-4532. The examiner can normally be reached on M-F 9-6:30, 1st Friday off.
